

Azure OpenAI Service & GPT Models

Topic 1 - What is Azure OpenAI?

Understand

Azure OpenAI provides OpenAI models through Azure.

Instead of:

Application

↓

OpenAI

Enterprise companies use:

Application

↓

Azure OpenAI

Why Azure OpenAI?

Enterprise requirements:

- Security
 - Compliance
 - Governance
 - Monitoring
 - Private Networking
 - RBAC
 - Managed Identity
-

Topic 2 - Azure OpenAI vs OpenAI

Understand the differences.

Capability	OpenAI	Azure OpenAI
GPT Models	Yes	Yes
Private Endpoint	No	Yes
RBAC	No	Yes
Azure Integration	No	Yes
Entra ID	No	Yes
Enterprise Governance	Limited	Yes

Topic 3 - GPT Models

Learn:

GPT-3.5

- Fast
- Cheap

GPT-4

- Strong reasoning

GPT-4o

- Text
- Image
- Audio

GPT-4.1

- Coding
- Architecture
- Enterprise scenarios

Topic 4 - Model Deployments

One important Azure concept:

Model

≠

Deployment

Example:

Model:

GPT-4o

Deployment:

gpt4o-dev

Applications call:

gpt4o-dev

Not

GPT-4o

directly.

Topic 5 - Azure AI Foundry

Learn:

AI Foundry Components

Models

Agents

Prompt Flow

Evaluations

Monitoring

Safety

Topic 6 - Security Architecture

Authentication

Preferred:

Managed Identity

Avoid:

API Keys

for enterprise systems.

Authorization

Azure RBAC

Networking

Private Endpoints
